

Hot Dots Flash Cards

Hot Dots™ Flash Cards are two cards in one! Use the cards with the Hot Dots Power Pen™ (sold separately) for independent review and practice of math facts, or use the cards by themselves as traditional math facts flash cards.

What's on Each Card?

Using the Cards with the Hot Dots Power Pen

Motivate independent practice of math facts with Hot Dots Flash Cards and the Power Pen. Read a problem and then use the Power Pen to select an answer dot from the sides of the card. The pen gives instant feedback each time. When a correct answer is selected, the pen lights up and makes one of four happy, congratulatory sounds. When an incorrect answer is

selected, the pen makes a simple “boing” sound. (Sorry, no lights!)

Demonstrate how the Hot Dots Flash Cards and the Power Pen work before letting learners work independently. Show how to position the pen on a Hot Dot answer choice. Make sure the tip of the Power Pen touches the center of the dot below the answer and that it sits flat on the surface of the Hot Dot.

- Tips:**
- Make sure the cards rest on a hard surface when using the Power Pen on them.
 - Never laminate the cards.

Using the Cards as Traditional Flash Cards

Hold up a card with the problem facing the learner. Have the learner read the problem and answer it out loud. Check the answer. The correct answer appears in the small box in the top center of the side facing you.

Additional Activities: Sort cards into groups of facts that have the same answer, or into groups of the same fact family.
