Reading Roundup!

Eco-Friendly Word Play Game!

Includes
25 basic building
block words!

Contents

- 1 game board
- 50 word cards
- 4 game pieces

How to Play

1. Each player chooses a game piece and places it on the corresponding “home base.” There is one “home base” in each corner of the board.
2. Shuffle the cards.
3. Deal five cards to each player. Put the remaining cards away.
4. Players place their cards face up in front of them.
5. Pick the youngest player to go first. Play continues to the left.
6. Start at your “home base” and move your game piece one space, which is connected by the lasso path.
7. Land on a space with a word that matches one of your cards, say the word and flip the card face down. If you land on a space that has more than one of your words, read and flip over up to two cards. If you land on a space without any of your words, wait there until your next turn.
8. Move one space per turn and only in the direction of the bird.
9. When all of your cards are face down, you have found all your words on the board and can start heading back to your home base. Remember—move back one space per turn.
10. The player to reach “home base” first wins the game!
